

AW-D152 addressable fire telephone cabinet is specifically designed for the fire telephone system. It integrates a protective casing and an internal communication module.

The sturdy box structure can effectively protect the internal telephone extension from dust, moisture and daily impacts, ensuring the equipment can remain stable and ready for use in harsh environments for a long time.

Features

- ✓ Surface mounting
- ✓ 2 Wire bus Communication
- ✓ Programmed by AW-PR101L
- ✓ Self-locking function

Technical Specification

Model No.	AW-D152
Work Voltage	24VDC
Frequency Response	300~3400Hz
Monitoring State Current	≤ 0.6mA
Communication State Current	≤ 15mA
Working Environment	Temperature: -20℃ ~ +50℃ Relative humidity: ≤ 95% without condensation
