

Description

Up to 4 power amplifier 100V program inputs;

The 4-channel inputs can be input separately, or they can be cascaded together to form an input for a power amplifier, enabling the common output of 16-channel partitions.

Features

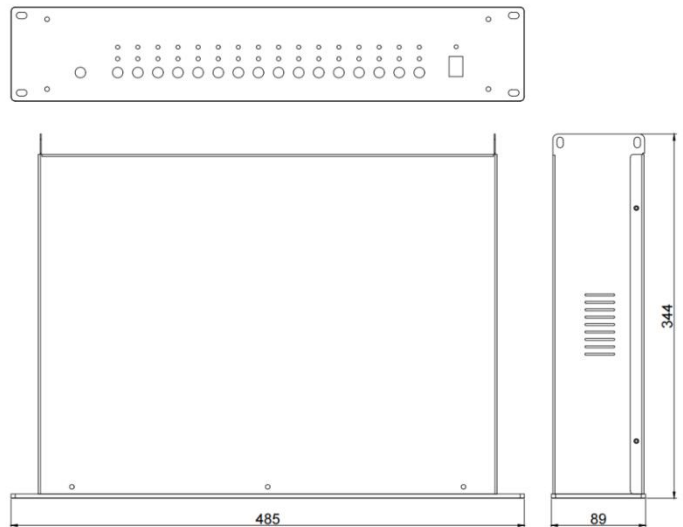

With zone working status indicators.

Zones can be switched at will without interfering with each other.

The panel is composed of 1 power indicator light, 16 activation switches and 16 isolation indicator lights.

2U standard rack design.

Dimensions (mm)

Technical Specification

Model	AW-EV604
Power Supply	100-260VAC
Frequency:	50HZ/60HZ
Input Channel:	4
Output Zone Numbers:	16
DC Work Voltage:	24V±10%
Slave Controller Communication	RS485 bus
Work Temperature:	-10~50°C
Work Humidity:	≤95%RH
weight	About 4.3KG
